The amount of power your solar energy system can generate is dependent on sunlight. As a result, your solar panels will produce slightly less energy when the weather is cloudy, and no energy at night. However, because of high electricity costs and financial incentives, solar is a smart decision even if you live in a cloudy city. (1)

On Sept. 24, 2020, MnDOT Commissioner Margaret Anderson Kelliher announced the Afton Solar Array pilot project with developer, Novel Energy Solutions. The project guarantees lower electricity costs for MnDOT by providing consistent energy savings from up to 40 percent of all the renewable energy produced on the site.
