

# Novus green energy systems Serbia

Does Serbia have a green energy strategy?

This groundbreaking project, led by the Hyundai Engineering and UGT Renewables consortium, marks a significant shift in Serbia's energy strategy. Serbia aims to boost green energy, reduce fossil fuel reliance, and stabilize its energy grid through this ambitious initiative.

How many solar plants are there in Serbia?

Serbia will soon see six large solar plants strategically positioned across the country. Key locations include Negotin, Zaječar, and Bošnjace. Together, these sites will provide 1 GW of solar energy capacity. Each plant will also have advanced battery storage systems totaling 200 MW, ensuring stable electricity flow across the national grid.

How much solar power will Serbia produce in a year?

Only through strategic partnership and auctions (if successfully implemented) is Serbia expected to reach a capacity of more than 2.3 GW of new solar and wind power production facilities in the years ahead. Additionally, there are many projects developing on a commercial basis that do not count on incentives.
