Interestingly, pings run 60-70ms, which is equal to or better than any of the many other sites I access daily, yet none of them exhibit this slowness at all. Traceroute shows 17 hops, which is also typical.. It seems that any return traffic (response) from outbackpower is being delayed for some reason, and I would like to resolve this..

Dear Kurt, You are absolutely correct. Yesterday we figured-it-out, 2-wired 230V 50Hz, just L1 230V and N legs. When I purchased this inverter last July, got some advice from your rep. in India, and he told me 8045 would work as is 120 and 240 AC input...

Matt, I have wondered as well if the Radian's built in magnetics act like the balancing transformer which would allow an unbalanced load. By the overload specs 100A at 240V and 200A at 120V, that would seem to be the case, but it isn't clear if the magnetics would overheat if you applied a continuous 4500W or say 5000W 120V load on the inverter.

Hello there, I am in the process of setting up an off-grid solar power system for a cabin located in a remote area. I have chosen to use OutBack Power products based on their reputation for reliability and performance; but I am new to the specifics of designing and optimizing such a system.

sales@outbackpower | Mojave(TM) Lithium Energy Storage System Specifications Model: OGHESS8015A 12/2022 #980-00088-01-001 REV C Additional Features Listings/Certifications: UL 1741 SA, CSA 22.2 No. 107.1, IEEE 1547-2003, IEEE 1547.1-2005 RoHS: Yes, directive 2011/65/EU Operating Temperature Range: -4 to 122°F (-20 ...
