

Pakistan greenvolt power

What is greenvolt power?

Greenvolt Power is a fully operational renewable energy platform that develops and operates onshore Wind and photovoltaic installations across several countries with a solid proven track record. -- from start to finish. Our set of services will empower your business and production.

Should Pakistan expand solar and wind power?

Solar and wind power should be urgently expanded to at least 30 percent of Pakistan's total electricity generation capacity by 2030, equivalent to around 24,000 Megawatts. Expanding renewable energy can make electricity cheaper, achieve greater energy security, reduce carbon emissions, and help Pakistan save up to \$5 billion over the next 20 years.

Does Pakistan need solar power?

According to the World Bank, utilizing just 0.071 percent of the country's area for solar photovoltaic (solar PV) power generation would meet Pakistan's current electricity demand. Wind is also an abundant resource. Pakistan has several well-known wind corridors and average wind speeds of 7.87 m/s in 10 percent of its windiest areas.

How does the project support the energy transition in Pakistan?

The project supports the energy transition with the following measures: Supporting institutions in the Pakistani energy industry to adopt regulatory requirements, policy guidelines, or instruments for implementing the Renewable Energies Strategy.
