More people in Papua New Guinea than ever before are turning to solar power to meet their energy needs. 60% percent of households now use solar lighting, compared to just 2% eight years ago, according to a World Bank / International Finance Corp report.

To be precise, 60% of households in Papua New Guinea rely on off-grid solar for daily lighting needs. The government of Papua New Guinea targets to electrify 70% of the country by 2030. There is no doubt that solar energy will play a critical role in the attainment of this goal. Therefore, solar installers and solar experts should expect vast ...

"With 300 days of sunshine in many parts of the country, there's great potential to harness solar power for businesses and households," Lighting Papua New Guinea highlights. The program, supported by the governments of Australia and New Zealand, has helped bring so-called pico, mobile pay-go solar to some 1.6 million Papua New Guineans for the first time.

Solar thermal cooling can reduce conventional electric AC loads; the system uses parabolic concentrators integrated with thermally driven double effect absorption chillers. Thermax's core strengths in cooling can offer a single point optimized solution to meet total requirements with turnkey execution for various applications.

We project that our solar absorption cooling unit will require less capital than traditional compressor-based cooling systems as well as reduced maintenance costs. Absorption cooling has been used to utilize waste heat from many processes for almost a hundred years. Typically, an absorption chiller is deployed as a cost savings element in a ...
