

What is the useful solar energy technical potential for Peru?

The useful solar energy technical potential for Peru is equivalent to 25,000 MW. Table 2 shows details of the geographical areas of the country with the greatest average solar energy, where values between 4.00 and 7.00 kWh/m²/day are recorded. Table 2. Geographical areas of Peru with the greatest average daily solar energy .

What are the options for concentrated solar power in Peru?

Considering Table 19, which shows the current technologies and technical conditions in Peru, the most viable options would likely be the utilization of parabolic trough collectors and solar power tower projects. Table 19. Characteristics of concentrated solar power (CSP) technologies considering the site-specific conditions of Peru .

Which region in Peru has the greatest solar energy potential?

Considering annual variations, the area with the greatest solar energy potential in the Peruvian territory is mainly located on the southern coast (16° to 18° S), where global horizontal irradiation (GHI) of 6.0 to 6.5 kWh/m²/day is available.

Can RES be used for power production in Peru?

Despite the promising potential of RES for power production in Peru and existence of abundant resources, feasibility studies to explore green and cost-effective technologies such as PV or wind are scarce. To the best of our knowledge, there is no thorough study on techno-economic analysis of hybrid systems (PV-Wind-Diesel) in Peru.

Can Peru generate electricity from a solar energy source?

This article presents the enormous potential of Peru for the generation of electrical energy from a solar source equivalent to 25 GW, as it has in one of the areas of the world with the highest solar radiation throughout the year.

Is Peru a good country to invest in solar energy?

It is recommended that Peru considers as a guide the successful experience of solar energy advances in neighboring South American countries, such as Chile and Brazil, where there is an important number of solar photovoltaic (PV) facilities in operation.
