

Who makes Nordex wind turbines?

As one of the world's largest wind turbine manufacturers, the Nordex Group offers high-yield, cost-efficient wind turbines that enable long-term and economical power generation from wind energy in all geographical and climatic conditions. With the Delta4000 platform, the Nordex Group relies on tried-and-tested series-production technology.

Why are wind energy developers interested in commercial wind energy in the Philippines?

Because of this high potential of wind energy in the country, wind energy developers are interested in commercial wind energy in the Philippines. Most of the projects of these wind energy developers are in the northern portion of the Philippines, where the Northeast Monsoon is expected to provide good wind energy yield.

Where in the Philippines can wind energy be developed?

Most of the projects of these wind energy developers are in the northern portion of the Philippines, where the Northeast Monsoon is expected to provide good wind energy yield. There are also other areas in the Philippines that also show favorable wind potential such as Guimaras and Rizal.

What is the potential of wind energy in the Philippines?

A study by National Renewable Energy Laboratory (NREL) shows that the Philippines has a wind potential installed capacity of 76.6 GW. Because of this high potential of wind energy in the country, wind energy developers are interested in commercial wind energy in the Philippines.

What is the Nordex group COE Programme?

The Group's COE programme actively promotes the expansion of alternative energies as we head into the future. The Nordex Group is one of the world's leading manufacturer and service provider for onshore wind turbines with over 35 years of experience.

What is the wind speed of Nordex N80?

As a default, Nordex N80-2.5MW will be used. This turbine has a rated power of 2.5 MW, a cut-in wind speed of 4 m/s and cut-out wind speed of 25 m/s. The wind speed has an interval of 1 m/s. Linear interpolation was done to have an interval of 0.1 m/s.
