

Photovoltaic panel replacement work

Can you repair a solar panel yourself?

It's not recommended for most homeowners to repair solar panels themselves, as they can be delicate and potentially dangerous if mishandled. It's best to hire a professional solar panel technician. Are solar panel repairs covered by warranties?

Should I replace my solar panels?

If you've observed signs of wear or decreased output in your solar panels, now is the time to act. Consult solar experts, assess the current state of your installation, and explore the options available. The advancements in solar technology mean that replacements are not just about maintaining power output but amplifying it.

How do I choose a solar panel repair company?

Ideally, you'll choose a solar panel repair company that can help to service and repair your solar panel system for many years to come. Help get that selection right first time by checking out online reviews from previous customers. For such an important investment in your home, this simple action will provide the reassurance you need.

What is solar panel care?

Call our team now to discuss our solar panel care provision in greater detail. An integral part of your solar panel maintenance agreement is the routine inspection that keeps your system in good working order, identifying any damage or problems and putting solar panel system repairs into effect straight away.

Are old solar panels better than new solar panels?

Over the past few decades, the efficiency of solar panels - how well they convert sunlight into electricity - has seen significant improvements. Old solar panels, while still functional, might not be harnessing solar energy as effectively as the newer models.
