

Popular Science on Solar Power Stations

What are solar powered portable power stations?

These solar-powered portable power stations keep your batteries full during power outages and off-grid campouts. These days, gas-powered generators aren't the only option for charging on the go. Solar-powered generators--also called portable power stations--are a growing sector of the power market.

What is a solar power station?

It sounds like science fiction: giant solar power stations floating in space that beam down enormous amounts of energy to Earth. And for a long time, the concept - first developed by the Russian scientist, Konstantin Tsiolkovsky, in the 1920s - was mainly an inspiration for writers.

Are solar power stations a science fiction idea?

It's an idea that has captured the imagination of writers and futurists for decades--the first published mention of the concept likely came in a 1941 short story by I, Robot writer Issac Asimov. But even as communication satellites, moon landings, and probes to Mars became reality, solar power stations remained in the realm of science fiction.

Could a solar power station be made from the Moon?

The butterfly-inspired Greater Earth Lunar Power Station could be made with materials found on the moon. An orbiting solar power station above the moon could one day be feasible. European Space Agency Harvesting solar power here on Earth is limited to a location's daylight hours--a restriction that doesn't exist while in space.

What is the largest solar power station in the world?

Power stations: The Solar Star PV power station produced 579 MW (MW AC) in 2015 and became the world's largest photovoltaic power station at that time, followed by the Desert Sunlight Solar Farm and the Topaz Solar Farm (both with a capacity of 550 MW AC), all constructed by US companies.

Do solar panels need a power station?

Solar panels without a power station are not particularly useful, so the term "solar generator" typically refers to both the panels and the station used in conjunction. What Size and How Much Capacity Do You Need? One of the main differences in these models is how much charging "juice" they can store, referenced in watt-hours.
