

What is REBASE platform?

Competitiveness in energy markets is increasing with shorter trading horizons and increased volatility from weather-driven renewable production. The Rebase Platform provides tooling to create accurate energy forecasting models. Get started quickly with state of the art open-source algorithms. Take full control with our open-source Python SDK.

Is Bosnia and Herzegovina a good place to invest in geothermal energy?

Bosnia and Herzegovina has a great potential for this energy sector, primarily due to its geographical location and great wealth of underground thermal springs. Geothermal resources of Bosnia and Herzegovina include hydrothermal systems, geo-processed zones and hot dry rocks.

What is the potential for bioenergy in Bosnia & Herzegovina?

Concerning bioenergy, the greatest potential lies in wood residues, since forests are one of the main natural resources of Bosnia and Herzegovina. There are currently two biogas power plants, but there is no available data about biofuel and other biowaste utilization.

1. Introduction

Can solar power plants improve biodiversity in Bosnia and Herzegovina?

Future development of HPPs and the construction of new dams in Bosnia and Herzegovina should consider Strategic Environmental Assessments and effects on rivers' biodiversity. Solar energy has a great perspective for the implementation of solar power plants that counts for 70.5 × 10⁶ GWh of irradiated energy per year.

What are the geothermal resources of Bosnia and Herzegovina?

Geothermal resources of Bosnia and Herzegovina include hydrothermal systems, geo-processed zones and hot dry rocks. The central part of Bosnia and Herzegovina, as well as the northern part, are areas suitable for the use of geothermal resources [7].

What are the main res in Bosnia & Herzegovina?

The main RES in B&H, hydropower plants, solar power plants, wind power plants and geothermal energy will be given in accordance with existing data, reports and literature. In addition, the review also summarizes data on the use of bioenergy including biogas, biofuels and overall use of biomass in Bosnia and Herzegovina.

Through its Energy Policy Activity, USAID helps Bosnia and Herzegovina attract investment and integrate its energy market into regional and EU markets. USAID's implementing partner for this five-year \$7.5 million project is Advanced Engineering Associates International.

aims to provide an overview of Bosnia and Herzegovina's current and future renewable energy plans. It was established that the highest potential for energy production lies in hydropower plants.

Bosnia And Herzegovina Renewable in % Electricity Production. Under its draft NECP (2023), Bosnia and Herzegovina aims to reach a share of 43.6% of renewables in final energy consumption by 2030 (up from 36.6% in 2021), including 70% for electricity, 61% for heating and cooling, and 8.4% for transport (46%, 53%, and 0.2%, respectively, in 2021).

Energy security in Bosnia and Herzegovina: Will the EU Energy acquis be helpful? December 2022; In book: Bosnia and Herzegovina and European Union: Obstacles and Challenges (pp.93-111)

Bosnia and Herzegovina: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen ...

Bosnia and Herzegovina adopted a National Environmental Action Plan, which provides action path to address the major environmental issues of the country. In the energy sector the target will be achieved by increasing energy efficiency and usage of renewab

The total available biomass related to the agricultural sector in Bosnia and Herzegovina has a total energy potential of 9422 × 10¹⁵ J. Out of that, 8876 × 10¹⁵ J is from ...

The average price of electricity in Bosnia and Herzegovina, in June of 2024, has been 0.0853EUR per kilowatt hour. Electricity price has increased EUR 0.0008 kWh, 0.95% since the previous semester. Meanwhile, the average price of electricity without taxes in Bosnia and Herzegovina in that period was EUR 0.0724 per kilowatt hour, compared to EUR 0.0717 kWh in the previous semester.

This report is an overview of Bosnia's infrastructure and energy sector development strategies, investment needs and financing options for the coming years. Priority . Bosnia and Herzegovina - Infrastructure and Energy Strategy

Although Bosnia and Herzegovina has energy sources such as geothermal, solar and wind, the primary sources of electricity supply are from hydroelectric power plants and thermal power plants. The ...

believes that Bosnia and Herzegovina is fully committed to the obligations arising from the Convention. B - SUMMARY Bosnia and Herzegovina submits this report pursuant to Articles 7, 8 and 16 of the CNS, as recommended by the Guidelines regarding National Reports under the Convention on Nuclear Safety (INFCIRC/572/Rev.6).

Bosnia and Herzegovina is an upper middle-income country which has accomplished a great deal since the mid-1990s. Today, it is an EU candidate country and is now embarking on a new growth model amid a period of slow growth and the global financial crisis. [23] Bosnia and Herzegovina is a small, open economy, dominated by services, which accounted for 55% of gross domestic ...

The EU's policy is clear - energy efficiency is the priority! Therefore the key energy efficiency thesis is to lower energy expenditure and costs by implementing measures with keeping the level of comfort or ...

Energy 55% Bosnia and Herzegovina came close to reaching its 2020 target. The new Renewables Law adopted in Republika Srpska in February 2022 partially transposed the REDII, while in the Federation a similar law was drafted. Energy Efficiency 49%

The main source of primary energy in Bosnia and Herzegovina are hydropower and thermal power plants (which use coal) and cover over 62% of total primary energy consumption. Bosnia and Herzegovina ...

Bosnia-Herzegovina market report. Table of contents Author: Enerdata Subject: Bosnia-Herzegovina market report; updated August 2022. Complete Bosnia-Herzegovina Market Report includes updated energy data, prices, companies activities, graphs ...

BOSNIA and HERZEGOVINA (Update November 2020) The Directive 2010/31/EU on the energy performance of buildings 1. ... FBiH: Article 33 of the Law on Energy Efficiency of the Federation of Bosnia and Herzegovina (Official Gazette of FBiH no. 22/17), RS: Article 90 (2f) of the Law on Spatial Planning and Construction ("Official Gazette of the ...

Thus, the value of specific energy losses in Bosnia and Herzegovina ranges from 130 kWh/m² to even 300 kWh/m² [14, 15]. The existing construction funds in BIH, by its structure and characteristics, represents a great potential for energy saving.

Energy (in)dependence of Bosnia and Herzegovina and strategic partnership with the Republic of Croatia - analytic view . 1 SUMMARY . In the period from March 2023 to the beginning of February 2024, data were collected and surveys and interviews with relevant interlocutors were conducted with the aim of making this analysis.

On January 1, 2024, Bosnia and Herzegovina assumed the rotating Presidency of the Energy Community for the year. To commemorate this milestone, Ambassadors from EU Member States, representatives from Energy Community Contracting Parties and Observer Countries, high-level delegates from International Organizations, and members of the diplomatic corps gathered in ...

This Renewables Readiness Assessment aims to support Bosnia and Herzegovina on its path towards integrating a higher share of renewable energy, and diversifying its national energy mix to align with its ...
