We're committed to using our innovative energy storage solutions to power flexible ways to facilitate clean energy. Green hydrogen Through partnerships and our collective expertise, we're helping decarbonise industry by developing and ...

Founded in 2015 as a bespoke electrical consultancy services provider who primarily focused on large scale renewable energy (solar / wind farms) and high-voltage electricity distribution projects (sub-stations etc)... we acknowledge the increased necessity, in early 2021, for localised backup power and renewable energy solutions particularly in the commercial and residential sectors.

We're committed to using our innovative energy storage solutions to power flexible ways to facilitate clean energy. Green hydrogen Through partnerships and our collective expertise, we're helping decarbonise industry by developing and operating green hydrogen plants fuelled by clean, renewable energy.

Murra Warra projects, completed in 2022, showcased the combined expertise of both companies in delivering large-scale wind energy solutions. Argoon wind farm is poised to deliver significant benefits to the local community and region, with more than \$40m in community benefit-sharing commitments over the project's 30-year lifespan.
