Where is Russia's new lithium-ion battery manufacturing facility located?

Russian state-owned Rosatom State Nuclear Energy (Rosatom) has announced it will build its 3 GWh lithium-ion battery manufacturing facility in Kaliningrad, in Russia's province of the same name, sandwiched between Poland and Lithuania along the Baltic coast.

Will Russia produce a prototype battery by the middle of the year?

The move follows Russia's claim last month that it will have produced prototype batteries by the middle of the year.

Where can I buy a gel battery in Russia?

GEL battery technology is being introduced into production. AKOM is the main supplier of the battery to the Russian market - more than 50% of all supplies, and 70% of all exports of the industry from Russia. The dealer network consists of 100 partners in all regions of Russia, 36 more - in the CIS countries, South-East Asia and Western Europe.

Could Russia's nuclear power monopoly be a potential partner for EV batteries?

Potanin also named Russia's nuclear power monopoly, Rosatom, as a potential partner for an EV battery venture in Russia. The company also said it is looking for ways to integrate in the global EV battery production as a way to weaken the impact of the Western sanctions against Russia on its business.

Will Russian energy storage firm Renera invest in EV batteries?

June 23, 2023: Russian energy storage firm Renera says a special investment contract providing incentives and financial backing for domestic production of batteries for EVs and stationary storage systems was signed at the St Petersburg International Economic Forum on June 16.

The article presents market shares in Russia: lithium cells, batteries and accumulators, by different brands. Also import by all distributors and by component market distributors is presented.
