Why should you use a solar charging station?

Our built-in solar forecasting and Dynamic Phase Switching also helps you optimally charge with solar power. This way you save up to 50% on your energy bill. Our smart energy management system not only monitors the energy consumption of your home charging station but also your home, balancing usage between the two.

Are portable solar chargers a good idea?

Portable solar chargers don't have this problem, and as long as the proper conditions are met, they can provide a practically unlimited supply of electricity for your mobile devices, flashlights and battery packs or portable chargers. Compact and lightweight, they're perfect for camping, travel and emergency use.

What is a portable solar charger?

Portable solar chargers are typically designed to fold for storage, making them easy to keep around in a bag, seat-back pocket or emergency kit while still providing a large enough surface area to capture sufficient solar energy to produce electricity. This all means a portable solar charger is an extremely valuable addition to your emergency kit.

Can I pay for a charging session with the EV line?

Yes. The EV Line offers each user several options for starting and paying for a charging session: Scan the QR code to start charging and pay for your charging session immediately via the Smappee App. The QR codes are included in the packaging box of your Smappee charging station.

What is the difference between a USB wall charger and a solar charger?

While a standard USB wall charger will deliver a steady current close to its maximum capacity, a solar charger's current will fluctuate based on the amount of sunlight it's exposed to.
