How do I design a PV Grid connect system?

The document provides the minimum knowledge required when designing a PV Grid connect system. The actual design criteria could include: specifying a specific size (in kWp) for an array; available budget; available roof space; wanting to zero their annual electrical usage or a number of other specific customer related criteria.

How does a PV inverter work?

Traditional PV inverters have MPPT functions built into the inverter. This means the inverter adjusts its DC input voltage to match that of the PV array connected to it. In this type of system, the modules are wired in series and the maximum system voltage is calculated in accordance

What are the requirements for a solar inverter system?

There are two main requirements for solar inverter systems: harvest available energy from the PV panel and inject a sinusoidal current into the grid in phase with the grid voltage. In order to harvest the energy out of the PV panel, a Maximum Power Point Tracking (MPPT) algorithm is required.

What is a photovoltaic (PV) module?

Photovoltaic (PV) module integrated with advanced inverter technologies has the ability to indirectly tune the reactive power from the grid with strict precision which is impossible to achieve with conventional passive compensators.

How does a grid tied PV inverter work?

A typical PV grid tied inverter uses a boost stage to boost the voltage from the PV panel such that the inverter can feed current into the grid. The DC bus of the inverter needs to be higher than the maximum grid voltage. Figure 20 illustrates a typical grid tied PV inverter using the macros present on the solar explorer kit. Figure 20.

What are the design criteria for a grid connect PV system?

The actual design criteria could include: specifying a specific size (in kWp) for an array; available budget; available roof space; wanting to zero their annual electrical usage or a number of other specific customer related criteria. Determining the energy yield, specific yield and performance ratio of the grid connect PV system.
