Can you sell solar energy back to the National Grid?

Householders and businesses with solar panels installed, who generate more renewable electricity than they need, can sell energy back to the National Grid under the Smart Export Guarantee (SEG). An increasing number of people are now benefiting from this government-backed initiative, and you could be one of them.

How do I sell excess electricity generated by my solar PV system?

To sell excess electricity generated by your solar PV system, you need to apply directly to a licensed SEG tariff supplier. Your SEG licensee doesn't have to be your current top-up electricity supplier. You can choose different companies for SEG payments, electricity supply, and gas supply.

Can you sell solar energy through SEG?

No, at the moment, the only option for homeowners is to sell excess solar energy back to the grid or store it using battery storage for future use. Are there special requirements to sell energy through SEG? Yes, The SEG requires your solar panels to be under 5MW capacity and you must have an MSC certificate for installation.

How much money can you make selling electricity back to the grid?

Installing an export meter and feeding the excess power back to your supplier would earn you between 6p-9p per kWh sent back. To get the most out of selling electricity back to the grid, consider the following: Regular Maintenance: Ensure that your renewable energy installations are in top condition.

How do I sell electricity back to the grid?

To get the most out of selling electricity back to the grid, consider the following: Regular Maintenance: Ensure that your renewable energy installations are in top condition. Regular maintenance can help maximise efficiency and, by extension, the amount of electricity you can sell.

Should you sell unused solar energy?

Storing can lead to cost savings, increased energy independence, reduced carbon emissions, and improved efficiency. On the other hand, selling unused electricity can earn homeowners money, further reducing carbon emissions and contributing to grid stability. How do you Maximise your Solar Panel Renewable Energy?

5 ???&#0183; See It Why it made the cut: This Jackery solar generator delivers the best blend of capacity, input/output capability, portability, and durability. Specs. Storage capacity: 2,160Wh Input capacity ...

1. EcoFlow Delta 1800 Solar Generator Quad Kit - \$1,659 The EcoFlow Delta has quickly become one of the most popular solar generators on the market. With an 1800 watt inverter, 1300 watt hour battery and 400 watts ...
