Pernille Erenbjerg, Chair, KK Wind Solutions: "To facilitate the transition towards greener and sustainable energy supplies and meet the increasing demand for wind energy, larger and more mature suppliers to the wind industry are much needed. By combining KK Wind Solutions and Nissens Cooling Solutions, we have created a significant supplier ...

The CM60 is a core member of the sixth generation control system known as WTC6, developed by KK Wind Solutions. It is typically used as main controller in wind turbine control systems, but can be used for other applications as well. The CM60 controller is designed to tolerate the high levels of vibration and EMC disturbances in a wind turbine.

90. As Sierra Leone looks to secure a sustainable future, the spotlight is on the immense potential within its renewable energy sector.
