

What is the solar power industry in Vietnam?

Solar power industry. The potential for solar energy in Vietnam is between 60 and 100 GWh per year for concentrated solar power, while for photovoltaic (PV) systems, it is around 0.8 to 1.2 GWh per year.

Is solar energy the right choice for Vietnam?

"Solar energy is the right choice for Vietnam because it's proven technology that can be quickly and readily deployed, even in challenging sites," she adds. Vietnam's transition to renewable energy comes as the country's electricity needs continue to increase due to strong economic growth projected at 5-7% per annum over the coming years.

Is Trina Solar a good choice for Vietnam?

"Trina Solar modules use dual-glass, useful for challenging environments like these where proximity to the sea means higher humidity and salt spray," says Wang. "Solar energy is the right choice for Vietnam because it's proven technology that can be quickly and readily deployed, even in challenging sites," she adds.
