

Solar energy contact number Namibia

How will solar power benefit Namibia?

The generation of solar power will complement Namibia's available green energy portfolio, such as hydro-electricity, which already constitutes more than two-thirds of our installed power capacity. Electrifying key parts of our economy and of our neighbours will spur unprecedented economic activity and growth for Namibia and Southern Africa.

Is Namibia a good place to install solar power?

With these conditions, Namibia has a huge potential for installing solar water heaters, solar photovoltaic (PV) systems, and concentrated solar power (CSP) plants. Namibia's most common PV technology application is solar PV-based pumping, which is mainly used in cattle farms.

How much solar radiation does Namibia have?

The country's average high direct solar insolation is 2200 kWh/m²/year, with a cover of minimum clouds. The southern region of Namibia experiences -on average- 11 hours of sunshine/day, and an average direct solar radiation of 3000 kWh/m²/year.

What are the solar conditions in Namibia?

The solar conditions in the Namibian region are to be considered of the best worldwide for solar generation. The country's average high direct solar insolation is 2200 kWh/m²/year, with a cover of minimum clouds.

What services do we provide in Namibia?

We supply generators, INVT UPS applications and general electricity backup solutions to all sectors of the economy in Namibia. We cater for various bulk water storage applications to all sectors in the economy. We specialize in sectional steel tanks - either ground level or elevated.

What services does a solar power company offer?

We provide EPC, IPP, O&M services, utility scale solar diesel hybrid solutions and battery storage systems for mines and for utilities and more. Engineering, Procurement and Construction Services for the turnkey installation of PV Solar Power Plants.

PHASE 1: Sustainable Development Through Renewable Energy Investments in Namibia Endowed with abundant natural resources, Namibia stands at a crossroads in pursuing sustainable development. Despite boasting some of Africa's best solar and wind resources, a staggering two-thirds of the population needs access to electricity. This stark reality hinders ...

In northern Namibia, a ten-hectare solar energy farm produces 9,000 MWh of energy per year. Producing power since July 2018, it was developed with the support of ClimatePartner. The project is helping increase the proportion of renewable energy sources in Namibia's energy mix and improve regional and national

supply.

Sedgeley Energy is an experienced provider of customised solar photovoltaic and solar-battery hybrid solutions. SolarSaver was established in 2016 as a vehicle through which Sedgeley Energy and its investment partners could offer ...

BACKGROUND. Founded in May 2016, Quantum Solar Investments has become a leading force in the Renewable Energy (RE) industry. We partner with top-tier global suppliers to deliver high-quality RE solutions and advanced technology, transforming Namibia's ...

trates the contribution of renewable energy to Namibia's overall energy mix, including petroleum, in 2006. The peak electricity demand in 2006 was 490 MW against an available power generating capacity of 393 MW, while the capacity of the installed solar electricity at that time was less Figure 1 Namibia's energy consumption by resources in 2006

The Ministry of Mines and Energy (MME) is the sole administrator of the Solar Revolving Fund (SRF). The SRF is a credit facility established by MME to stimulate demand for the utilization of renewable energy technologies in the ...

The Ministry of Mines and Energy is renowned as performance driven. By promoting, facilitating and regulating development and sustainable utilization of Namibia's mineral, geological and energy resource through competent staff, innovation, research and stakeholder collaboration in a conducive environment for the benefits of all Namibians and the world.

NAMIBIA . Though it is large, the southwestern country of Namibia has a relatively small population -- and an interesting energy landscape. Namibia has a history of load shedding problems and has long relied on imported power from Eskom, on top of a low electrification rate of 56.3% (as of 2020). The drought at the Kariba Dam, the world's largest reservoir and a major ...

This international benefits favour the development of solar energy in Namibia . The availability and affordability of electricity from the Southern African Power Pool is the main threat to the future of solar technologies. 44,000 MW of electricity was proposed to be generated from an hydropower station . However, if this is implemented, the ...

an OFFGRID & sustainable way of living solar ENERGY & clean WATER Request a quote Zero Food Waste = Zero Hunger Solar DC Refrigeration ...help address food losses of 30% in sub-Saharan Africa (USD 4 billion). Read more "The market fundamentals for off-grid appliances are strong, they just require the right encouragement and support" SOGAM [...]

Quantum Solar Investments specialize in turnkey Renewable Energy solutions to fit your exact requirements. ... Windhoek. Email. Info@quantumsolarnam . Contact Number +264811288755. User account menu. Log in;

Solar Power as Primary Energy for Green Hydrogen "Namibia"s world-class solar and wind resources give it a long-term competitive advantage in producing green hydrogen and green ammonia." ~ World Bank.

NEC Energy has been associated with Solahart Australia since early 1980 and holds the Solahart Agency status in Namibia. For over 35 years NEC Power & Pumps has been actively promoting Solahart solar water heating systems in Namibia for domestic and commercial usage. NEC offers a variety of solar systems suitable and custom-made to suit many different applications.

Solar Revolving Fund Ministry of Mines and Energy, 6 Aviation Road, Private Bag 13297, Windhoek, Tel: 061-2848111, Fax: 061-2848175, Email: srf@mme.gov.na Web: Republic of Namibia Ministry of Mines and Energy Technologies Financing solutions for Renewable Energy Solar Home System (SHS) Maximum amount: N\$60,000.00

The government, the ECB, and NamPower have all expressed interest in grid-connected solar and wind renewable solutions, and in May 2015, Namibia inaugurated its first-ever solar power plant - a 4.5 MW plant - which represents one percent of the country"s current production of energy.

A total of 67 MW of solar power capacity has been rolled out and connected to the national grid in the past five years, according to the energy ministry. Solar energy accounted for almost 7% of the country"s total power generation capacity as of year-end 2017, according to SolarPlaza"s Solar Energy Africa 2018 report.

Welcome to the official website of the Namibia Energy Institute (NEI). ... The Foundation"s strong track presence in South Africa has also brought to light a number of best practices and lessons learned which can be shared and transferred across the region. ... CONTACT US. Address: 17 Brahm Street, Windhoek, Namibia Phone: +264 61 207 2154

NEC Energy embodies our commitment to providing cutting-edge Solar energy and Storage solutions tailored to the needs of both our residential, commercial, and industrial customers. Our team of experts is dedicated to delivering ...
