Each input supports 11-60V at 15A. I'd like to set up at least 400w to each, but ideally over panel to between 550-600w. Looking at option like the Renogy bifacial 115w, would need 4-5 panels, but unless I'm misunderstanding, which is very likely, even setting them up in 2 sets of series and parallel combination I would go over tolerances.

Solar panel 60v Madagascar

Hi all. I have some roof mounted residential panels in 3S arrays that are 120v that I feed into a Bluetti AC500. I'd like to also be able to use these panels with smaller power stations like the Delta Max or Anker Solix 2000 but it seems that most midsize power stations are moving towards a 60v limit which is pretty tricky to get optimized panels wired up.
