

Is Latvia planning to use wind and solar energy?

Skeptical of Latvia's ambitions to use wind and solar energy is the Chairman of the Board of the Latvian Renewable Energy Federation Janis Irbe. He pointed out that Latvia has no strategic plan in energy for the next ten years. The interest of foreign investors is high, projects are examined in a number of ways, but not leading to real jobs.

Which countries install solar panels in Latvia?

Estonia, Finland, Latvia, Lit... List of Latvian solar panel installers - showing companies in Latvia that undertake solar panel installation, including rooftop and standalone solar systems.

Should solar parks be developed in Latvia?

The development of solar parks in Latvia has gained momentum in the last two years, and in the near future, the first solar parks that are currently under development will begin to bear fruit. The interest in developing solar parks in Latvia is shown by both local and foreign investors.

Is Latvenergo planning a solar park in Latvia?

Latvenergo has considerable plans, operating throughout the Baltic, said Ivars Inkins, head of development of the company Saules parki. "The projects of solar parks in Lithuania and Estonia have progressed more rapidly so far, but there is currently a sharp increase in Latvia. Investments are worth tens of millions of euros.

How much of Latvia's electricity is green?

More than 60% of electricity produced in Latvia is green, produced by hydroelectric plants. In Lithuania and Estonia, however, there was no such thing. Clearly, they had to focus on this much more quickly, because otherwise they would not achieve climate objectives.

Are solar parks a good idea for Estonian energy companies?

Gatis Lazda, Chairman of the Board of the Estonian renewable energy producer Evecon, said that the development of solar parks is of great interest to the large energy companies that have announced their investment plans, but this is a matter of concern and confusion because the grid has exhausted capacity.
