Get a Quote on Your Solar Panels Installation in 60 Seconds The average home can save £1,190 every year with solar panels! Solar panels are a long-term investment, so choosing the right installer from the outset can save you a lot of trouble down the line.

How to install solar panels?

Make space for the solar panel accessories (solar inverter, cables and solar batteries, if desired), for instance in a plant room 4. Plan a day for installation 5. Erect the scaffolding (this can be done by your supplier or by a company you organise) 6. The solar panel mounts will be installed 7. The professionals will install the solar panels 8.

Can solar panels be installed on a house?

If you're getting solar panels installed onto the roof of your house, the installers will need to construct scaffolding around the building before they can crack on with the process. This will take the most time out of all the steps - usually about a day - but will mean the installers can have safe and secure access to the roof.

How much does a solar panel installation cost?

Solar panel installation quotes usually include labour costs, so you won't need to arrange that separately. Labour costs can vary, but rates typically range from £300 to £500 per day per technician. For reference, larger residential projects tend to require two installers over three days, so the cost would be between £1,800 and £3,000.

Can solar panels be installed on a roof?

"The solar panels will need to be mounted on the roof by installers who understand roofing and will need some scaffold decks to safely get the panels to the roof.
