

Solar power panels lease

Should you lease solar panels?

There are five main advantages to leasing solar panels: Save money on electricity: the system will reduce how much energy you use from the grid when switched on. Low or no upfront costs: you don't have to buy the panels and other equipment upfront.

What should you know about solar leasing?

The most important thing to know about solar leasing is with respect to ownership. For a fixed rate or fee that is calculated or determined by the leasing company, you can have solar panels installed on your home.

What is a solar lease?

Solar leases are similar to car leases; they are a form of third-party ownership. Under a solar lease, the third party installs solar panels on your property and then sells you the electricity produced. Your monthly lease payment is based on the estimated annual production of your solar system.

Should I buy or lease a solar system?

Finance subject to status. Both leasing and buying a photovoltaic system have certain advantages. Buying allows full ownership of the solar panel installation. Leasing a solar system, on the other hand, is a great option, especially for those who can't afford to buy a PV system outright.

How long does a solar lease last?

Solar lease term lengths are usually between 20 and 25 years, which is about the lifespan of solar panels. The solar developer will usually offer a solar monitoring program so you can track how your solar panels are performing. If an issue with your system is detected, the developer will be responsible for repairs at no cost to you.

How do Solar Lease companies make money?

All the solar lease providers listed make their money by financing a solar system for your home and then selling you the solar electricity from the panels. In most cases, the companies promise you will save money on your power bills in the first year - a win-win situation.
