

Solomon Islands solar manufacturers

How many solar homes are there in the Solomon Islands?

"Solomon Islands currently has one of the lowest levels of access to electricity in the region, with over 85% of the population of Solomon Islands still without access to electricity and for this project alone, we received over 6,000 applications to obtain only 2,000 solar home systems," said Mr Aimaema.

How long do solar panels last in Solomon Islands?

The majority of solar energy systems installed in Solomon Islands last less than 2 years due to bad system design and poor user training. Superfly's systems are designed to last a minimum of 5 years (for basic systems) and 10 years for premium systems.

What are the main industries in Solomon Islands?

Industrial production was estimated to be growing at a rate of 0.7% in 2009 (CIA World Factbook). Solomon Islands' main industries include fisheries, forestry and mining, with most manufactured produce being food, beverages, tobacco and wood products. The production of tuna and timber in particular plays a vital role in the country's economy.

Who is Superfly solar?

Superfly is Solomon Islands only quality focused solar energy company. Superfly is focused on quality. We design our solar systems for Solomon Island's hot temperatures and remote, rural conditions.

We design our solar systems for Solomon Island's hot temperatures and remote, rural conditions. We only use GEL lead acid or Lithium batteries; quality components from manufacturers like Victron Energy, and we ensure that we "oversize" the amount of solar power to keep batteries ...

What is a Solar-Window(BIPV)? Solar Windows are the most common type of BIPVs. Used all over the world in residential buildings, houses, and commercial units. Solar Windows transform any building into a green building. With these windows, the cost of energy is tremendously reduced. Most off-grid houses use Solar Windows for power production. Where is a Solar ...
