SolarEdge Technologies and its subsidiary, Kokam Limited Company, have announced the opening of Sella II, a two gigawatt-hour (GWh) battery cell manufacturing facility in the Eumseong Innovation City of Chungcheongbuk-Do, South Korea.

What is South Korea's solar capacity?

Any solar installer or solar industry professional will agree that this is an outstanding achievement. It is also essential to note that South Korea's solar capacity has been on an upward trajectory since 2018. In 2018, the nation's solar capacity stood at 2.4 Gigawatts and 3.8 Gigawatts.

What makes South Korea a great battery company?

R&D effort to be one of the most innovative battery companies in the world. They make use of our state-of-the-art manufacturing and testing facilities to build the most advanced products on the market today. South Korea is a forward-thinking economy situated in the Asian continent. It is also amongst the top ten electricity consumers in the world.

How much will South Korea's solar market cost in 2021?

Investment in South Korea's solar market will be approximately \$5.1 billion in 2021; only 3.8 Gigawatts of solar plants are expected to secure funding. You could be one of the individuals working on these projects if you play your cards right. It is also worth noting that South Korea boasts of several solar equipment producers and distributors.

Is South Korea a good place to buy solar equipment?

It is also worth noting that South Korea boasts of several solar equipment producers and distributors. In addition to that, it has a healthy network of ports and logistical infrastructure. Therefore, you can easily import any equipment that may not be available locally.
