Picture courtesy of Bangkok Post . Thailand's new National Energy Plan (NEP) aims to drive significant investment and promote clean energy, with a projected 2.9 trillion baht in capital spending over the next 13 years. Central to this initiative is the emphasis on solar energy to reduce carbon dioxide emissions.

Spero Energy seeks to increase the availability and competitiveness of biobased products. One area which could benefit greatly from a biobased and biodegradable product is the agricultural chelate market. Chelates are molecules which bind micronutrients essential for plant growth, and efficiently deliver the micronutrients to the plant. The main chelates used today are ...
