

Where can solar energy be used in Sudan?

The optimal locations found in Sudan for utilizing solar energy were Wawa, followed by Kutum, Wadi Halfa, Dongola and Al-Goled due to their low costs of electricity, high clearness index and high levels of solar radiation.

Is solar a viable alternative to fossil fuels in Sudan?

“In Sudan, access to energy is a critical tool, and solar is an effective way to achieve this. First, it is an alternative to fossil fuels, so importation and transport challenges are avoided, environmental benefits provided, and ongoing fuel costs eliminated.

How can Sudan achieve energy self-sufficiency?

Encouraging solar and wind power in the country's energy portfolio could help Sudan achieve its goal of energy self-sufficiency. Egyptian policies such as nurturing and promoting renewable technologies and scientific research, feed-in tariffs, and tax exemptions could help Sudan achieve its objectives.

Is solar energy feasible in Sudan?

Situated in the sunbelt, Sudan is one of the largest countries in Africa endowed with an extremely high solar irradiation potential. However, no work has been done in the literature with a strategic context to study specifically the feasibility of renewable energy systems in Sudan despite the abundance of solar resource.

Is solar energy making a comeback in Sudan?

Fortunately, the country is now witnessing a comeback to solar energy as it is an effective tool to drive development, employment, and stability - particularly in rural and agriculture-focused communities. “In Sudan, access to energy is a critical tool, and solar is an effective way to achieve this.

Why is energy development important in Sudan?

Sudan faces many energy development challenges brought about by high electricity subsidy levels and climate-induced impacts on hydroelectric generation which has been decreasing at a rate of about 4% per year. Improving access to modern and affordable energy is a development priority for Sudan.
