MEPA Energy supports you the best quality with high level experience for your needs.

Fuel mix (fossil fuels vs renewables) As of 2020, 52.9% of Suriname's electricity was generated from fossil fuels, 46.7% from hydro power, and 0.4% from solar energy. Suriname aims to keep its share of electricity from renewable sources above 35% by 2030, according to the country's updated NDC (Nationally Determined Contribution) plan.

Other forms of transformation, such as extracting gas or oil from coal, play a relatively minor role in the energy systems of most countries. Oil refining One of the most important types of transformation for the energy system is the refining of crude oil into oil products, such as the fuels that power automobiles, ships and planes.
