Bolivia currently generates nearly two thirds of its electricity from fossil fuels. But now it's promoting renewables so they'll account for the vast majority of its energy in just a few years' time.

Bolivia's updated NDC includes non-greenhouse gas (GHG) mitigation and adaptation targets and actions focusing on water, energy, forests and agriculture sectors. It establishes a total of 31 specific targets to be achieved by 2030.

## Target energy solutions Bolivia

By investing in the development and deployment of energy storage technologies, Bolivia can not only meet its ambitious renewable energy targets but also contribute to global efforts to combat climate change and ...
