

There are virtually no sites in Hong Kong that are readily useable for power stations and it has been necessary to excavate and reclaim to form suitable flat areas from rugged coastal terrain. The choice of Tap Shek Kok for the Castle Peak Power Station was no exception. This site was an area of land and sea bed, granted by Government in 1978.

Description CLP Power Hong Kong and China Southern Power Grid are currently owning the project having ownership stake of 70% and 30% respectively. It is a Steam Turbine power plant that is used for Peakload. The power plant run on dual-fuel. The primary fuel being used to power the plant is coal.
