

Who is Impala energy?

Impala Energy is a power development company focused on small-to-medium sized natural gas power projects in SSA. Over 130 years of combined professional experience in the fields of power development, infrastructure and finance, and over 25 years working specifically on power and infrastructure projects in SSA

How much natural gas does Turkmenistan supply?

Upon completion of the fourth D line, the annual Turkmen natural gas supply will reach a contractual 65bn m³/y. Turkmenistan also supplies gas to Azerbaijan, Iran, Russia and Uzbekistan, and recently signed a memorandum of understanding (MoU) to supply 9bn m³/y of natural gas to Iraq.

Is biomass a source of electricity in Turkmenistan?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Turkmenistan: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

Is Turkmenistan resuming gas imports?

The recent resumption of gas imports from Turkmenistan was preceded by a diplomatic visit from Gurbanguly Berdimuhamedov, the Chairman of Turkmenistan's Halk Maslakhaty (People's Council) and former President of Turkmenistan, to Tehran in May.

Why is Iran sourcing gas from Turkmenistan?

With surging domestic gasoline consumption, reaching an estimated 20% increase from 2022 to 2023, Iran's gas production is still short of its consumption needs. For years, Iran has sourced gas from Turkmenistan to fulfill its northern region's needs. Both countries recognize the mutual benefits of collaboration on energy matters.

Will Turkmenistan join the global methane pledge?

Speaking at the COP28 climate summit in Dubai, Turkmenistan's President Serdar Berdimuhamedov announced the country's accession to the Global Methane Pledge. In so doing, Turkmenistan joined over 150 countries working collectively to reduce global methane emissions by at least 30% from 2020 levels by 2030. This content is for EI members only.

Turkmenistan's energy market is controlled by the State. Primary energy shares (in 2008) consisted of 72.4% gas and 27.6% oil. Most of the population receives natural gas and electricity for free. Those who do pay, enjoy the world's lowest energy prices. Yet, inefficiency and waste are clearly a result of this policy.

Impala Energy is currently constructing a project in southern Nigeria which is designed to capture flared natural gas and make use of it for commercial and industrial clients to displace their diesel consumption. The
