

Will Space Solar Power Reykjavik Energy in 2030?

Space Solar has secured an agreement with Reykjavik Energy to provide electricity from a space-based solar plant in 2030. There is a letter of intent in place between the UK-based startup and the Icelandic utility, with Space Solar expecting to transmit solar energy from orbit within five years.

What is space based solar power (SBSP)?

[...] With a commitment to investing £7.3 billion to early-stage energy projects and leveraging private investment through the National Wealth Fund, Space Based Solar Power (SBSP) aligns perfectly to achieving the new Labour government's mission driven green ambitions.

Could space solar be a source of electricity in Iceland?

Sam Adlen, co-CEO and executive director at Space Solar, told pv magazine the startup has already started identifying potential sites in Iceland where receivers could be located for electricity beamed from space, working in partnership with Reykjavik Energy and local cleantech consultancy Transition Labs.
