

Vanuatu solar system on credit in

What is a Vanuatu solar PV system?

This project is aligned to the Government of Vanuatu's National Energy Road Map for increasing the energy access for rural communities in Vanuatu. The installed solar PV system is a stand-alone 230/400 VAC 50Hz solar micro-grid combined with 48V batteries operating 24 hours and 7 days a week.

Does Vanuatu have a carbon credit?

Vanuatu has tapped on the carbon credit market to be able to sell its carbon emission offset to the Swiss government as their National Determined Contribution (NDC) for instance a 10kwh of solar will be equivalent to how much fuel used is offset and purchased by the Swiss government as their NDC.

Is solar a good idea for Vanuatu?

Antony Garae, Director of the Vanuatu Department of Energy, said this project is a great boon to his country, where 80 percent of rural residents lack electricity. "Solar is the best solution for these areas not only because of its obvious contributions to climate change mitigation but because fuel is costly and difficult to transport," he said.

Does Vanuatu have a solar farm?

The Pacific island nation of Vanuatu is demonstrating its dedication to sustainability with the initiation of its largest solar farm on the island of Efate. This significant project marks a major step in the country's efforts to cut down on carbon emissions and take full advantage of its abundant solar resources.

Will a new solar micro-grid change Vanuatu's lives?

(Photo: Ian Iercet) On the remote island of Malekula, the second-largest island in Vanuatu, a new solar micro-grid is changing the lives of over 2,800 people- boosting local development while contributing to Vanuatu's sector specific target of transitioning to close to 100 percent renewable energy for electricity by 2030.

Is Vanuatu a sustainable country?

Beyond this large-scale farm, Vanuatu has introduced additional sustainable initiatives, such as the installation of solar-powered streetlights and small-scale solar systems in isolated communities. These efforts align with the nation's ambitious goal to source 100% of its electricity from renewable resources by 2030.
