

Teknoware also manufactures a range of central battery systems. In addition to the standard features, there is also available an automatic addressable testing system. Teknoware's entire product range is designed to meet the ...

Although the 24 C system is compact in size, it has also an integrated compartment for batteries. It's the most cost-efficient solution for implementing addressable emergency lighting with central battery unit. If there are several 24 C systems in the property, it's easy to monitor them via optional ACM monitoring software.

The 7 series is compatible with all our 230 V addressable luminaires, which makes it easy to upgrade an old central battery system. The central battery unit is easily upgraded according to the number of luminaires in the property. Depending on the model, the 77C central battery unit has 24-72 output circuits.

The central battery system in the TKT7 series offers an efficient, high-tech emergency lighting solution. You can easily modify the system according to your needs, making the new TKT7 series a truly flexible choice. ... Teknoware Oy . Our passion is finding the best lighting, interior or emergency lighting solution for trains, buses, buildings ...

The document provides information about the TAPSA CONTROL CENTRAL BATTERY UNIT TKT6608CFP. It can supply medium to high numbers of luminaires through 8 output circuits. It has inputs of 220-240 ...

The central battery system is compatible with all of our 230 V addressable luminaires so you can replace an existing system with ease. The TKT7 series is an easy to adapt solution for locations which need different numbers of luminaires. ... Teknoware Oy . Our passion is finding the best lighting, interior or emergency lighting solution for ...

The central battery system is compatible with all of our 230 V addressable luminaires so you can replace an existing system with ease. The TKT7 series is an easy to adapt solution for locations which need different numbers of luminaires. The central battery system in the TKT78C series is particularly suitable for medium-sized buildings.

Central Battery Systems Self Contained Systems Escap self-contained luminaires MyTeknoware For Ships and Vessels. Services. After-Sales Service Design support. ... Teknoware Oy . The 7 series is compatible with all our 230 V addressable luminaires, which makes it easy to upgrade an old

central battery system. The central battery unit is easily upgraded according to the number of luminaires in the property. Depending on the model, the 76C central battery unit has 4-24 output circuits. Max. battery capacity 150 Ah.

Teknoware offers a 230V AC/DC-based Central Battery System (CBS) consisting of control panels, aesthetically appealing emergency and exit luminaires, sub-circuit monitoring modules, address modules to connect third-party luminaires ...

Explore Teknoware Middle East's Addressable Central Battery Systems, offering intelligent power solutions for emergency lighting. Learn about the advanced features, addressable control, monitoring capabilities, and enhanced efficiency designed for safety and compliance in various applications across

The document provides information on Teknoware's central battery units for emergency lighting systems, including their features, specifications, and monitoring options. Central battery units can operate at 230V or 24V, with ...

The 7 series is compatible with all our 230 V addressable luminaires, which makes it easy to upgrade an old central battery system. The central battery unit is easily upgraded according to the number of luminaires in the property. Depending on the model, the 78C central battery unit has 4-24 output circuits. Max. battery capacity 65 Ah.

Explore Teknoware Middle East's Central Battery Systems 7 Series, providing innovative power solutions for emergency lighting. Learn about the advanced features, centralized control, monitoring capabilities, and improved efficiency designed for safety and compliance in various applications across the Middle East region.

The 31 and 41 central battery units are an easy and economical solution for supplying a relatively small number of luminaires in a limited area. These systems are especially suitable for properties and premises where the system is to be divided into several independent areas. The 31 system has 4 output circuits.
