

Want to build a wind farm

How to start a wind farm?

Bank financing is the most popular option for landowner-developers and regular developers wondering how to start a wind farm. This is largely because the finance is coming from a trusted source and is unlikely to fall through during the construction phase. Several UK banks offer top-tier investments for new renewable energy projects.

Can a wind farm be built?

For a start, the local authorities are expected to signpost areas that are appropriate for wind farm development. But unfortunately, the current national planning policy is making it incredibly difficult to build new projects.

How much land does a wind farm need?

The first thing wind farm developers will need to do is understand the potential capacity of the land they're working with. So, making sure you have the land required for a wind farm is a crucial first step for landowners. The average land required for a wind turbine can be anything from 25-40 acres. And that's just for a single turbine.

Are wind farms a good investment?

Our answer is a resounding YES. Not only do turbines provide a clean source of domestic energy, but they're an excellent way for landowners to earn additional income. Plus, most wind farms will generate significant profits once the project has recouped its initial investment.

How many wind farms are there in the UK?

Demand for wind energy is increasing fast. Renewable energy accounts for a modest 3% of UK electricity generation, but the government wants to increase that to 10% by 2010 and 20% by 2020. The UK has 114 wind farms involving 1430 turbines and providing enough electricity to run 735,000 homes.
