Are in-roof solar panels a good idea?

While to some people regular solar panels can be unappealing, an in-roof solar system is a great solution if you want to prioritise your home's design. Lightweight: Unlike a traditional solar panel, which weighs around 18 - 24kg, putting some strain on your roof, integrated solar panels weigh about 10 - 20kg per panel.

Can solar panels be installed on a building roof?

Solar energy brings many positives from a climate change perspective, but installing solar PV panels on building rooftops can introduce new risks to the building and occupants. Fires resulting from electrical faults is the most common cause of loss associated with roof mounted solar PV installations.

Are in-roof solar panels a complete roofing solution?

Although sometimes mistakenly referred to as solar roof tiles, integrated solar panels are not designed to look like tiles or slates, so they aren't generally a complete roofing solution. So, when installing in-roof solar panels, you'll still need to account for other materials in your planning and calculations of in-roof solar panels costs.
