

Can you put solar panels on a roof?

Ground-mounted systems are another alternative to fitting solar panels on your roof. Some state-of-the-art systems can rotate to follow the sun and maximise the amount of electricity they produce. This can be a good option if your roof isn't a suitable place to put a solar panel system. However, they may need foundations and can also be pricey.

Do you need a bulky rooftop solar installation?

Luckily, you don't have to choose between a bulky rooftop solar installation or nothing at all. Homeowners have several options to make use of the sun's energy, from backyard solar panels to solar pergolas and beyond. Many of the best unique solar panel placement ideas integrate seamlessly into a home's exterior. Ready to dive in?

Can you put a solar panel on a thatched roof?

Thatched roofs are not suitable for solar panels. There's no mounting system designed for thatch, which wouldn't be ventilated well enough underneath the panels and so would rot. And given that thatched roofs already present a fire risk, putting an electrical system on top wouldn't be sensible!

Can solar panels be installed on a house?

Solar photovoltaic (PV) panels can be installed on a wide range of homes. We've heard from people installing solar panels on bungalows and terraces, as well as semi-detached and detached houses. If your main house roof is unsuitable (a thatched roof, for example), solar panels can instead be installed on a garage or other outbuilding.

Can solar panels be installed on an asbestos roof?

Installing solar panels on an asbestos roof is a lot trickier than any other type - many installers won't want to touch those projects with a bargepole - but it's not impossible. Rafters are fitted over the roof to support the solar modules, without disturbing the asbestos cement.

Do solar panels need to be installed at the same time?

The solar panels do need to be installed at the same time as the green roof,however,since the mount is fitted underneath the growing medium to weigh it down. On the plus side,the transpiring vegetation keeps the panels well ventilated. Thatched roofs are not suitable for solar panels.
