

Wind power and solar power are subsidies fraud

Why are 'unsubsidised' wind farms receiving constraint payments?

Why are "Unsubsidised" Wind Farms Receiving Constraint Payments? Payments to wind farms to reduce output are an ongoing national scandal, with the cost to consumers now totalling well over £1 billion since the payments began in 2010.

Does wind work without subsidies?

President Donald Trump has repeatedly questioned the economics of wind energy, saying that wind "doesn't work" without subsidies. Experts have differing assessments of that.

Will 'negative subsidies' affect offshore wind projects?

Offshore wind projects approved recently are expected to operate with 'negative subsidies' - paying money back to the government. This money will be used to reduce household energy bills as the farms begin producing power in the mid-2020s.

Can offshore wind farms help lower energy bills?

Offshore wind farms in the UK could reduce household energy bills by producing electricity very cheaply. This cheap electricity generated from renewable energy projects, including offshore wind and solar farms, has been subsidized by government support schemes.

Why do wind producers switch off a government subsidy?

Wind producers on newer government subsidy contracts are paid a fixed price, generally below current market rates, to generate electricity. By switching off, producers may therefore be able to make rates well above their fixed prices.

What is a federal subsidy for wind?

The primary federal subsidy for wind is a tax credit known as the production tax credit, or PTC, which offers wind facilities and some other renewables a small tax credit for every kilowatt hour of energy produced over a farm's first decade.

In 2022, consumers paid £215 million to turn wind farms off, and £717 million to buy gas-powered electricity to make up the difference, according to figures from the UK Wind Curtailment Monitor.

The so-called wind and solar "industries" will last for as long as the subsidies keep flowing, and not one second more. Every time the subsidy reins get tightened, the rent seekers ...

The wind and solar scam is mindbogglingly complex, because the scammers deliberately designed it that way.

Wind power and solar power are subsidies fraud

... Minnesota began its quest to power the state with wind ...

You would be wrong. Its contribution is still, after decades - nay centuries - of development, trivial to the point of irrelevance. Even after 30 years of huge subsidies, wind power provides only slightly more than zero energy to ...

A scam text claims that "the government decided to provide subsidies in the form of living expenses" due to "the cancellation of heating subsidies this winter.". The message includes a malicious link which leads to a ...

The latest round of offshore wind farms to be built in the UK could reduce household energy bills by producing electricity very cheaply. Renewable energy projects, including onshore and offshore wind and solar ...
