NRG Energy, Inc. has contracted under a Diesel Reduction Agreement with Virgin Limited Edition to develop a renewables-driven microgrid for Sir Richard Branson's luxury Caribbean retreat Necker Island, supplying electricity powered at least 75% by an integrated array of solar, wind and energy storage technologies.

Why would a project to provide an off-grid solution in the British Virgin Islands that generates a mere 500 kilowatts interest a company like NRG, the largest U.S. competitive power company with more than 53,000 megawatts of generating capacity? Why compete against more than 700 other bidders for such a small prize?
