

Can Zimbabwe build floating solar panels at the world's largest man-made lake?

(Bloomberg) -- Zimbabwe's industrial power users have secured \$250 million from the African Export-Import Bank to build floating solar panels at the world's largest man-made lake.

Will Kariba Dam get a 250-megawatt solar power plant?

The Intensive Energy User Group, made up of mining companies including a former local unit of Rio Tinto and Mimosa, plan a 250-megawatt plant at the Kariba Dam to be implemented in 18 months, according to a copy of its presentation seen by Bloomberg. That can be expanded to 1 gigawatt of solar capacity.

Will Kariba Dam be a floating solar project?

The key step toward realizing the floating solar project comes at a time when the drought-stricken nation is facing record power cuts. Due to low water intake, the Kariba Dam is currently generating an average of 125 megawatts, just around 11% of its installed capacity. Power cuts can last an average of 18 hours a day.

Uranus (also known as Caelus) is a planet character who is one of the main protagonists in Solarballs. He is the 7th planet from the Sun. Uranus (Caelus) is oftentimes chill and quiet, but is shown to be quite self-conscious, as he doesn't like to be made fun of by the other planets and gets annoyed easily whenever they tease him about his name or his smell. He also doesn't ...

Zimbabwe: Vungu Solar. Pioneering Zimbabwe's first internationally project financed solar IPP. Challenge. Zimbabwe has an electrification rate of 49%, with the majority of grid-connected customers being concentrated in urban areas. With growing demand from industry and domestic consumers, the gap between energy supply and demand is growing.

Spacecraft have flown close to Uranus but once: in 1986, when Voyager 2 drifted past the distant planet (capturing the image above). That flyby indicated Uranus's magnetic field conditions were weird in several ways, which astronomers have spent decades trying to explain. Now, a new analysis in Nature Astronomy suggests the probe just happened to ...

The new incentives will benefit off-grid solar providers more as these decentralised solutions are accelerating the electrification in Zimbabwe as well as other countries in Africa. Owing to outdated power generation and transmission infrastructure, Zimbabwe will rely on mini-grids for electrification in the coming years.

The seventh planet from the Sun with the third largest diameter in our solar system, Uranus is very cold and windy. The ice giant is surrounded by 13 faint rings and 27 small moons as it rotates at a nearly 90-degree angle from the plane of its orbit. This unique tilt makes Uranus appear to spin sideways, orbiting the Sun like a rolling ball.
